2 INDEPENDENT CLAIM 1

- 2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document) a method of feeding sheets of printing material in a printing machine on a continuous loop transport means (5), which has at least one dead space section (col. 8, line 4: "seam of the belt is regarded as an inappropriate portion"), in which case it has been taken into account that a region is detected for the control of a printing process by means of a detecting device (17), when a sheet is fed, its region to be detected is prevented from entering the dead space section of the transport means (col. 10, lines 43-49).

Therefore, all the technical features are known from this document D1.

- 2.2 Additionally, the subject-matter of claim 1 is not inventive in the sense of Article 33(3) PCT with regard to document D2, D3 or D4.

3 DEPENDENT CLAIMS 2-10

Dependent claims 2-10 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).
